Listing of the Claims:

1. (Withdrawn) A process for modulating virulence of a *Streptococcus* comprising: modifying a genomic fragment of the *Streptococcus*;

wherein at least part of the genomic fragment is capable of hybridizing to the isolated or recombinant nucleic acid molecule of claim 11; and

generating a clone having the modified genomic fragment.

- 6. (Withdrawn) The process according to claim 1, wherein modifying the genomic fragment comprises functionally deleting the at least part of the genomic fragment capable of hybridizing to the nucleotide sequence.
- 7. (Withdrawn) A clone of a *Streptococcus*, obtained by the process according to claim 1.
 - 8. (Canceled).
 - 9. (Withdrawn) A process for assaying virulence of a *Streptococcus* comprising: assaying an ability of the *Streptococcus* to infect a subject;

wherein the *Streptococcus* comprises a genomic fragment associated with a virulence factor to infect a subject; and
